PISCES™ UL971 Pipe Approval

OPW is pleased to announce the availability of its new PISCES™ SPN single-wall primary pipe and CPN coaxial double-wall series flexible piping to meet the UL971 2005 standard.

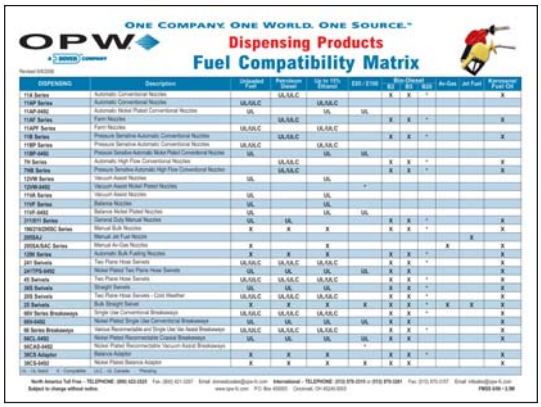
The PISCES™ SPN/CPN Coaxial Pipe Series is available in 1-1/2" and 2" sizes. It is designed to be the primary carrier and secondary containment pipe for motor vehicle fuels, concentrated fuels, aviation fuel, and is also E85 compatible.

Fuel Compatibility Matrix

OPW is pleased to introduce its new Fuel Compatibility Matrix, designed to assist you in choosing the correct OPW product based on your fuel usage needs.

This double-sided flyer includes an OPW Dispensing Product Fuel Compatibility Matrix on one side and an Environmental Products Matrix on the other.

Included in each matrix are products with UL Listings, as well as products that are currently under development in obtaining fuel compatibility ratings.



ONE COMPANY. ONE WORLD. ONE SOURCE.™

Fuel Compatibility Matrix

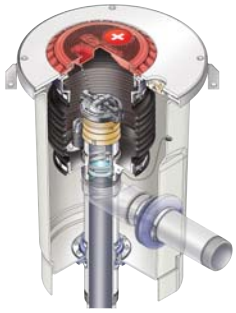
The dual-sided matrix chart is also available as a counter card and poster. To obtain a copy of the OPW Fuel Compatibility Matrix, please visit our web site at www.opw-fc.com. A PDF file is located in the Fuel Compatibility Matrix Online Folder which can be accessed by logging on to the site with the username and password “public” under the Interactive tab.

You can also obtain a hard copy version of the document by contacting OPW Customer Service at (800) 422-2525.

700L SuperBucket™

OPW is pleased to introduce a new vacuum testable double-wall spill container, the 700L SuperBucket™. The new unit eliminates the need for costly hydrostatic testing.

When vacuum testing, both primary and secondary containers are tested at once, further shortening your testing time. The new secondary container has a flat-walled, smooth surface for sealing a remote fill penetration fitting.



The PA40-RMT remote shallow elbow allows systems with shallow remote burial depth to be installed. Spill Container Cover options still include the patented OPW dam and groove Rain Tight (RT) design, as well as the watertight Sealable Cover (SC) featuring a cam-operated mechanism that expands the seal against the vertical wall of the mounting ring.

UL Listed Nozzles for E85/E100 Service

OPW is pleased to introduce the new E11 Series UL Approved Nozzles for use in E85 and E100 fuels.

UL Approved Nozzles with Immediate Availability:

Conventional	11AP-0492 (3/4" NPT)
Conventional Prepay	11BP-0492 (3/4" NPT)
Balance	11VF-0492

E85/E100 Compatible Hanging Hardware (UL Pending) with Immediate Availability:

Conventional Breakaway	66V-0492 (3/4" NPT)
Balance Breakaway	66CL-0492 (3/4" NPT)
Conventional Swivel	241TPS-0492

OPW offers E85/E100 compatible products for all other product lines including both underground and above ground storage equipment. Our ethanol compatible products contain nickel plating and special elastomers to make sure your equipment is in compliance with ethanol recommendations.
